

Demand & Supply Chain Manager

Location: Eindhoven, The Netherlands

About Altum RF (<https://www.altumrf.com/>)

At Altum RF, we're shaping the future of high-frequency technology. As a fabless semiconductor supplier, our mission is to deliver cutting-edge mmWave-to-digital solutions for industrial and professional markets worldwide. We combine innovation with exceptional technical expertise, customer service, and a passion for solving complex challenges.

Our Eindhoven office is located on the vibrant Technical University campus—a hub for innovation and collaboration. Here, you'll find a fully equipped RF lab with measurement capabilities up to 40 GHz, reliability testing facilities, and automated RF production testing.

Since our founding in 2018, Altum RF has grown rapidly and continues to expand globally. Our customer base includes many large international telecom and satellite communication companies and leading organizations such as the European Space Agency (ESA). This is your opportunity to join a fast-growing, forward-thinking company where your ideas matter and your impact is visible.

Your Role

As **Demand & Supply Chain Manager**, you'll be at the heart of our operations, ensuring that innovation flows seamlessly from concept to customer. You'll manage our global supply chain, working with subcontractors in Europe and Asia - including our local teams - and lead the planning process to align customer demand with production capabilities.

This is a hands-on role with significant growth potential. As our team expands, you will have the opportunity for career advancement with additional responsibilities and leadership roles, helping to shape the future of Altum RF's operational strategy. You'll report directly to the Managing Director and collaborate closely with development and sales teams, and local operations teams.

What You'll Do

- Align customer forecast and demand with internal and external production partners
- Develop and maintain production capacity plans for short-, mid-, and long-term horizons
- Manage ordering processes with supply chain partners

- Communicate production plans with customers
 - Optimize and enhance our ERP system; drive and implement improvements in ERP workflows to support scalability
-

What We're Looking For

- Bachelor's (or Master's) degree in relevant field
 - Experience in supply chain management
 - Hands-on experience with ERP systems
 - Affinity with IT and software
 - Strong communication and leadership skills; collaborative mindset
 - Occasional travel (approx. 10%) across Europe and Asia.
 - Fluency in English
-

Why Join Altum RF?

- **Innovation at your fingertips:** Work with cutting-edge RF technology in a high-tech environment
 - **Direct impact:** Short communication lines mean your ideas influence the company strategy and results
 - **Growth opportunities:** Be part of a fast-scaling company with a clear path to leadership
 - **Competitive package:** Attractive salary plus equity plan
-
